

LINCO CUT UP MACHINE

Our new automatic portioning machine, which is constructed of stainless steel and of food quality plastic material, consists of six units which transport whole birds to rotating blades. The units turn the birds to present them to the blades for each individual cut.

The machine is built to be versatile and much importance is attached to the following features:-

- the ability to change the position of the cutting blades quickly to achieve as accurate cuts as possible
- the ability to change the cutting specification quickly from 4, 6, 8 or 9 cuts (see photographs)
- the ability to clean the machine easily and quickly
- the ability to cut up to 20 birds per minute
- the ability to meet KFC standards

Specifications: height: 1.6 m (5'3")
outside dimension: 2.7 x 2.0 m
(8'10" x 6'7")

Motors: drive: 0.75 hp
keel bone: 2 x 0.5 hp
1st wing cut: 1 hp
split cut: 1 hp
2nd wing cut: 1 hp
cross cut: 1 hp
drum stick: 1 hp

Voltage: all voltages available
